EEBK 6400.5 PWX

Features:

Energy efficiency class A
In EU countries a common energy labelling system provides a guide to how efficiently built-in electric ovens and cookers operate. Class A represents the most efficient and economical use of electricity.

Multitherm plus
The hot air convection system with ring heating element enables cooking on up to four levels without transferring the flavour and aroma between different foods.

Ökotherm
The oven catalyser converts dirty, greasy air from the oven into clean air and water. This means a cleaner oven and at the same time clean, odourless air is discharged into the kitchen.

ÖkoEmail plus
With its extremely smooth, non-porous surface, this non-stick enamel finish makes grease and food residue easy to wipe off.

Roasting thermometer
The roasting thermometer makes sure every roast is cooked to perfection. It reliably indicates the degree the roast has been cooked, and turns off the oven when the desired results have been achieved.

5 baking and roasting programmes, 6 heating programmes
Precise cooking temperatures and times are specified by the programmes for perfect baking and roasting results.

Sensor touch control for programme and function selection
Sensor touch control facilitate the direct, easy selection of the desired oven functions at the touch of a finger.

Fully electronic system including programmable clock functions (duration, start or end time, minute minder)
The user-friendly electronic oven controls with symbol display provide user guidance for fully-automatic baking and cooking.

Automatic weight adjustment
Automatic weight adjustment adapts the cooking times and temperatures of cooking and baking programmes to the selected weight being cooked. This guarantees optimum cooking results.

Drop-down large-area grill
The large drop-down grill makes it easier to clean the ceiling of the oven when required.

Tangential cooling fan
The tangential cooling fan ensures that adjacent cabinets receive as little heat as possible thereby avoiding damage to the cabinet fronts.

Side oven lighting

Full glass front

Full glass inner door
The inner door glass is extremely easy to clean and due to its clips-fastening can easily be removed to clean between the glass panes.

Childproof lock

Choice of handles
Various handle designs allow you to perfectly match your built-in appliance to the style of your kitchen.

Accessories
1 enamel baking tray, 1 roasting grid, 1 baking tray

Electrical connection: 3.3 kW

Appliance dimensions: W x H x D approx. 595 x 455 x 562 mm (incl. 22 mm front)

Niche dimensions: W x H x D approx. 560 x 450 x 550 mm

Oven cavity capacity: 46 litres
